1230 York Ave.  
New York, N.Y. 10021

Dear Dr. Lederberg,

Our film about the 1940 N.Y. Institute/IBM laboratory is enclosed. This is a short version to be shown in June at IBM's Corporate Technical Recognition Event. Most of the company's top scientists, including the IBM Fellows, will be in attendance.

We're returning, under separate cover, the material you so graciously lent us. Please keep it available; if our plans for a full-length documentary materialize, we may very well want to dip into it again.

Thanks once more for allowing us to interview you and for your insightful contributions. The preliminary reactions to the film have been enthusiastic, and we hope you enjoy it as well. Please let us know!

We look forward to working with you again before long and wish you all the best.

Sincerely,

*Frank + Doris*
